

Blackboard ULTRA

Drag & Drop File Upload

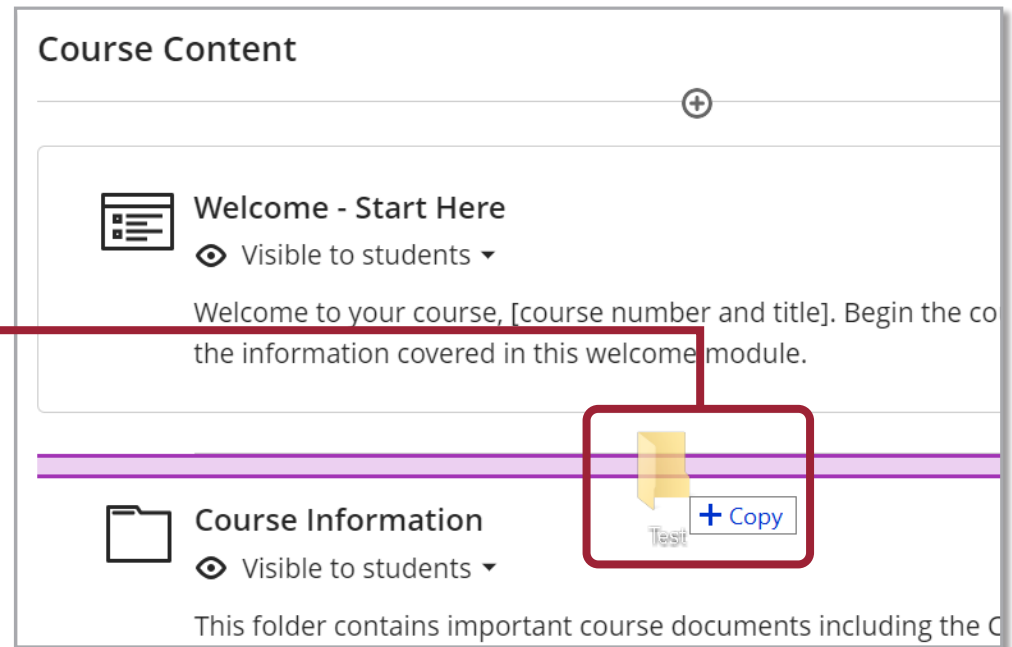

DID YOU KNOW?

Ultra makes it easy to upload multiple files and folders to your course.

Drag and Drop is much quicker than manually uploading one file or folder at a time.

Simply click and drag folders or files from your desktop to the content area of your Ultra course.

Remember: Ultra doesn't support nesting content beyond two levels. You can create a learning module or folder (level 1) with folders inside (level 2). However, level 3 folders are not allowed. This structure ensures easy access to course content within three clicks.
