

# Blackboard ULTRA

## Create an Introductory Video

Just like we are new to Blackboard Ultra, our students are too. I recorded a short introduction video to introduce myself, the class (syllabus etc.), and gave an overview of how I have laid out the Blackboard Ultra course. This video helps me connect with the students so they know there is a real person behind the course.

**Remember:** Keep your video short to keep students' attention the entire time. Keep your face showing during the video, even if you are sharing your screen.
